# Anton Zavodchikov

Golang Engineer  
White Salmon, Washington, United States

## Summary

Software Engineer with 4+ years of experience in full-stack development and technical leadership. Currently leading real-time communication solutions at Way2AR. Proven track record in architecting scalable systems, from building an Affiliate Management System handling 100+ partners to pioneering developer sourcing strategies through GitHub analysis of 87M+ repositories. Experienced in modern infrastructure with expertise in GitOps, ArgoCD, and Kubernetes. Strong background in distributed systems, real-time technologies, and open-source contributions, including work on the V Programming Language. Passionate about mentoring junior developers and driving technical excellence in development teams.

---

## Experience

### Way2AR

Software Engineer  
October 2023 - Present (2 years 7 months)  
United States

- Leading development of real-time communication solutions using WebRTC and LiveKit, delivering video conferencing projects with advanced capabilities
- Architecting and implementing CI/CD pipelines using GitOps with ArgoCD, reducing deployment times from days to minutes
- Spearheading system architecture decisions, selecting optimal technology stacks and design patterns for scalable solutions

### GitJob

2 years 2 months  
Full Stack Developer  
July 2022 - June 2023 (1 year)  
Russia

- Designed and implemented an Affiliate Management System (AMS) from scratch, successfully managing a network of 100+ partners and processing 12,000+ referrals with comprehensive financial reporting

### Golang Developer

May 2021 - June 2022 (1 year 2 months)

Perm, Russia

- Pioneered innovative developer sourcing strategies through GitHub analysis, processing 87M+ public repositories to identify top talent and technology trends
- Developed machine learning models for developer categorization and tech stack analysis, leveraging GitHub activity and StackOverflow data
- Created an innovative RPG-style developer matching platform with polar charts for skill visualization and team composition
- Built an admin dashboard using Vue.js for real-time monitoring of system metrics and job queues

### The V Programming Language

Software Developer

September 2020 - May 2021 (9 months)

Russia

- Enhanced V Language's standard library by implementing ADT JSON serialization, resolving critical issues for the developer community
- Led the redesign of the package manager website, implementing a modern UI with Svelte and Tailwind on a serverless platform
- Contributed to the Open Source V Language community through active bug resolution and feature development

---

## Education

Perm State University (PSU)

Bachelor's degree, Computer Science
